One accountable partner from definition to delivery.

Avenor LLC is a U.S.-based industrial solutions company. We bring technical definition, commercial alignment, specialized supplier coordination and field execution into one structured program—especially where projects cross disciplines, companies or borders.

01 Industrial automation

New machinery and line automation, controls architecture, PLC/HMI integration, drives, safety, installation and commissioning.

02 Plant & machinery upgrades

Controls modernization, mechanical and electrical retrofits, shutdown planning, performance improvement and production ramp-up.

03 Industrial project management

Scope, suppliers, schedules, risks, interfaces, field teams, acceptance and handover managed as one execution program.

04 Asset & real estate sales

Commercial positioning and transaction support for machinery, production lines, operating assets and industrial property.

05 Industrial business development

Market access, opportunity qualification, partnerships and cross-border commercial representation.

OPERATING FOCUS

Built for complex industrial environments.

Avenor supports organizations that need a practical link between machinery, automation, operations, suppliers and commercial objectives.

STEEL SERVICE CENTERS	Coil handling, processing, finishing, loading/unloading, web guiding, line controls and equipment modernization.
METAL PROCESSING	Integrated production systems, process equipment, handling, thermal systems, controls and operational upgrades.
MANUFACTURING FACILITIES	New equipment programs, automation retrofits, plant integration, commissioning and performance recovery.
ASSET OWNERS & INVESTORS	Technical-commercial support for acquisitions, divestitures, facilities, machinery and operating-asset transitions.

HOW WE WORK

01	02	03	04
DEFINE	STRUCTURE	EXECUTE	DELIVER
Objective, economics, scope and constraints.	Technical, commercial and partner model.	Stakeholders, milestones, risk and field delivery.	Testing, handover and operational readiness.

SELECTED EXPERIENCE

Industrial experience across systems and transactions.

Representative experience is presented at a project level. Client-sensitive documentation and technical credentials can be reviewed with qualified counterparties where permitted and subject to confidentiality.

\$15M	FINISHING	CUT-TO-LENGTH	AUTOMATION
INDUSTRIAL TRANSACTION	COIL SYSTEMS	LINE ENGINEERING	CONTROLS & RETROFITS

Manufacturing asset transaction · Indiana, USA

Coordination support for the sale and transition of a metal-processing facility, industrial real estate, production machinery and operating assets to a strategic buyer.

Integrated coil-finishing system · Mexico

Cross-border management of loading and unloading, conveying, roller coating, infrared pre-heating, thermal processing, cooling, ventilation and automation.

Web-guiding modernization · United States

Development of a closed-loop guiding retrofit integrating material measurement, automatic decoiler correction, safety PLC, HMI and proportional hydraulics.

Surface-finishing & cut-to-length systems

Programs involving decoilers, conveyors, robots, satin-finishing equipment, cut-to-length lines, ovens, drives, safety systems, controls and production-line integration.

START A CONVERSATION

Bring us the industrial challenge that has to move forward.

Avenor can enter at definition, supplier selection, project recovery, modernization, transaction or field-execution stage. Initial discussions focus on the operating objective, current constraints, site, schedule and the decision that must be made next.
